

OVERVIEW

AT&T Integration Solutions

Africa, Asia Pacific, Canada, Europe, Latin America, Middle East and North America

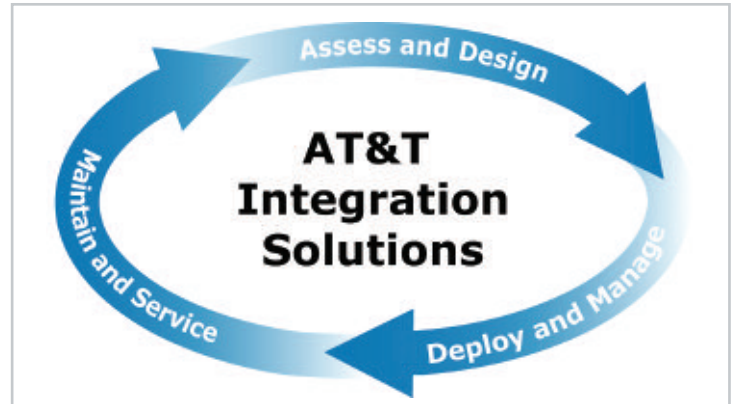

Let AT&T's team of dedicated, international networking experts deliver technology leadership targeted at your business challenges. Our proven success, networking expertise, intellectual property and world class business partners and agents all combine to help you achieve a better return on investment (ROI) and total cost of ownership (TCO), regardless of your business challenge.

Maximizing Customer Return on Technology by Extending our Scope

AT&T offers a seamless, global, customer-centric approach to integrated network solutions across voice, data and IP infrastructures. As program lead, AT&T is your general contractor and extends its tools and expertise by engaging pre-selected partners and third parties, around the globe, to deliver the cost effective, vendor neutral solutions that meet customer requirements and integrate their network and applications.

We bring technology solutions, expertise and resources in support of your changing business needs and challenges:

- Business Consolidation
- Emerging Technology and Convergence/Assessments
- Mergers and Acquisitions
- Network Strategy and Convergence
- Outsourcing/Out-tasking/Strategic Planning
- Telecomm Consolidation

We can assist you at any phase of your network evolution. In addition to program management for these challenges, AT&T will design and build all or part of your network solution.

The AT&T team can support the assessment, planning and design of your standard or custom migration with proof of concept testing and application readiness, prior to deployment. Post deployment, our team of experts is available to service and maintain as needed, by utilizing solutions partners and capabilities.

Service Areas of Focus include AT&T or client-owned Internet Data Center (IDC), IP Data Performance, Network Security, Program and Telecommunications Management, Voice over IP/IP Telephony and Wireless LAN.

An Experienced and Highly Skilled Team

AT&T's skilled network experts have in-depth consultancy and industry experience and are able to quickly relate technology to business. Over fifty percent of the AT&T team has at least one technical certification in the areas of IT, PBX/IP Telephony, Networking, Security and Wireless along with project management and business certifications supporting products from Avaya, Cisco, Microsoft, Nortel, Novell and Siebel to name a few.

Integration Solutions Address the Following Service Areas

Data and Internet Center Transformation	<ul style="list-style-type: none"> • Infrastructure and Inventory Assessment 	<ul style="list-style-type: none"> • Consolidation/Re-location
Global IP Data Performance	<ul style="list-style-type: none"> • Global Network Health Checks • Multi-Year Technology Roadmap 	<ul style="list-style-type: none"> • Performance Troubleshooting • WAN Application Readiness Testing (WANART)
Global Network Security	<ul style="list-style-type: none"> • Firewall Assessment • Ethical Hack 	<ul style="list-style-type: none"> • Global Policy Assessment with Country-Level Specificity
Global Program Management and Telecommunications Management	<ul style="list-style-type: none"> • Program Management for Network Evolution and Migrations 	<ul style="list-style-type: none"> • Large Scale Equipment Roll-Out • LAN/WAN Deployment
Voice over IP and IP Telephony	<ul style="list-style-type: none"> • Network Convergence • Technology Readiness and ROI Assessments 	<ul style="list-style-type: none"> • Solution Architecture, Design and Implementation
Wireless LAN	<ul style="list-style-type: none"> • Project Management • Design and Implementation 	<ul style="list-style-type: none"> • Wireless Security

AT&T assessed the LAN infrastructure for a global manufacturer and proposed an upgrade to the existing networking. The design utilized MPLS to simplify the network, ensure performance for new applications, and support a vendor agnostic IPT implementation. The AT&T team performed the assessment, designed the architecture, ordered, staged, configured, tested and installed the solution. The manufacturer now boasts a state-of-the-art IP Telephony environment and a 20% savings.

In-Language Skills

Our network integration consultants provide local presence and standard language skills including English and:

- Americas: French, Portuguese and Spanish
- Asia-Pacific: Cantonese, Japanese, Korean and Mandarin
- EMEA: Dutch, French, German, Italian and Spanish

Strategic Solutions

By offering integrated, global, end-to-end services, solutions and support, AT&T has provided companies with a single point of contact and accountability that mitigates risk and ensures well managed implementations. Our solutions provide customers with a clear ROI/TCO and offers enhanced performance, integration, control and security.

The scale, breadth and reliability of our diverse service portfolio, coupled with those of our pre-selected business partners, will deliver cost efficiencies and competitive advantages you can utilize anywhere around the world.
