About AT&T Global Business – Public Sector Solutions
Every day, thousands of experienced AT&T Global Business – Public Sector Solutions professionals seek to go beyond their customers’ expectations and deploy visionary solutions that serve our citizens, defend our nation and prepare for the future.

We serve as a trusted provider to the federal government, backed by a proven performance record in integrating our network expertise with IT professional services and a proven
managed service portfolio, which includes: traditional and IP-based voice; Wi-Fi; high-speed TIC; data transport; cyber security; cloud-based services; and mobility devices, services and applications. Our broad array of advanced technologies, dynamic service management tools, and experienced staff help us address critical government requirements. This effort helps to reduce expenses, modernize operations, and increase workforce productivity. AT&T has a proven track record of protecting information, protecting infrastructure and people. AT&T solutions enable agencies to focus on their mission and performance goals.

Fusing our core capabilities with innovation from AT&T Labs, we are driven to meet today’s demanding agency requirements, while establishing a path supporting emerging technologies. Underpinning every solution we build and deliver are the global resources and assets of AT&T, one of the world’s largest communications services providers, connecting people, infrastructure and information with speed, security and reliability.
