

# The AT&T Healthcare Technology Workshop

## Does Your Organization Have a Clear Plan For:

- Lowering costs, through an integrated approach to communications;
- Improving patient outcomes, by enabling real-time access to patient information;
- Shortening revenue cycles, by improving data entry and billing flows;
- Protecting confidential patient information, by strengthening security;
- Ensuring operational continuity, through well-planned disaster recovery programs;
- Reaching sustainability goals, by conserving energy and reducing your carbon footprint?

The AT&T Healthcare Technology Workshop is a working session where, together, we will evaluate multiple functional areas of your business, such as clinical operations, IT systems, administrative processes, materials management, your communications environment, and more. Workshop results will be collected and analyzed by our team of technology and business experts who will prepare a conceptual design for addressing your needs, utilizing the current best practices in the industry.

The outcome? A clear path forward to enhance your patients' healthcare experiences, increase job satisfaction for your healthcare team and improve cost structures throughout your organization.

AT&T's healthcare experts welcome the opportunity to work with you to develop a comprehensive technology plan that supports the goals of your organization. Contact your AT&T representative today to schedule your workshop.

### What it is

- **A free, extensive and interactive consultation to help you reach organizational goals**

### What it Gives Your Organization

- **Access to AT&T's healthcare and technology experts**
- **A plan to help you reduce implementation risk and increase return on investment**

## The Workflow Process

Assessment	Analysis	Conceptual Design
Pre-workshop teleconference identifies key participants and areas of focus; in-depth questionnaire gathers data to begin assessment process	Infrastructure and business processes are evaluated based on your needs assessment	Conceptual design is prepared by our subject matter experts for each major initiative
Workshop session, conducted at your location, identifies key organizational goals and establishes workshop objectives	Findings are reviewed and analyzed; before-and-after workflows are created	Presentation is delivered by our team at your location; findings and conceptual designs are shared and discussed
