The image displays a horizontal bar chart with 10 groups of bars. Each group consists of two bars: a black bar and a yellow bar. The yellow bars are consistently the same length across all groups, while the black bars vary in length. The bars are arranged in a staggered, overlapping fashion, with the black bars generally extending further to the right than the yellow bars. The background is white, and the bars are solid black and yellow.

A vertical arrangement of horizontal bars. The bars vary in length and are grouped into several sets. Some bars are solid black, while others have a small yellow segment at their left end. The bars are arranged in a way that suggests a list or a series of data points, with some bars being longer than others, creating a stepped effect. The yellow segments are consistently positioned at the left end of the bars they appear on.
