

Team AT&T

Tactical Communications Equipment and Services (TAC-COM) contract, administered by the Department of Homeland Security (DHS) HSS01-12-D-0004

Using best business, concurrent engineering, and design practices, Team AT&T has the ability to integrate and deliver on all five Technical Categories outlined in the Tactical Communications Equipment and Services (TacCom) contract administered by the Department of Homeland Security (DHS). As a prime TacCom vendor, Team AT&T is eager to help deploy a strong platform to modernize the infrastructure of DHS and its component agencies.

Our capabilities and credentials will enable Team AT&T to meet the TacCom requirements as a fully capable supplier of subscriber radio products and services, tower / infrastructure, Internet Protocol (IP) networking, microwave backhaul, infrastructure services and operation and maintenance services.

Team AT&T is comprised of exceptionally qualified companies including several members that have strong existing relationships with DHS. These pre-existing relationships, coupled with our collective expertise, serve as the foundation for our team's strength, efficiency, and ability to deliver an end-to-end solution to DHS. AT&T Government Solutions National Information Systems has previously worked with many of these firms to successfully deliver solutions (on time and in budget) to other federal

Commitment to the TacCom Program

Team AT&T shows its commitment to the TacCom Program by applying the broad experience and knowledge of its team members to the DHS mission:

- Clear understanding of the DHS mission and need to advance technology and services;
- Unparalleled technical strength and past performance experience in large/complex LMR, tower and microwave telecommunication systems design, implementation, Certification and Accreditation (C&A), security, and Operations and Maintenance (O&M) support;
- Detailed technical approach and project management plan currently in place for low risk program execution; and
- Optimal mix of resources, skills, processes, and corporate knowledge to execute the TacCom Program.

government customers. Our prior joint projects span the broad spectrum of commercial items and services that DHS requires.

Team AT&T will apply our industry-leading knowledge of IP-based services (in wireline and wireless domains) and the Government's systems engineering life cycle (SELC) to design, develop, integrate, test, implement, operate and maintain radio and infrastructure equipment at designated locations to:

- Provide effective LMR communications supporting officer safety in the field for DHS and its components on a 24x7 basis;
- Preserve the surrounding natural ecological environment during the design and implementation of the various TacCom Projects; and
- Enable a migration path to IP-based operation, which will provide the basis for the future consolidation of existing data networks and convergence of voice and video services.

The multi-disciplined Team AT&T is uniquely positioned to offer an integrated end-to-end solution in the five technical categories of tactical communications support the DHS requires – Subscriber Units, Infrastructure, Infrastructure Services, O&M Services, and Test Equipment.

About AT&T Government Solutions

Every day, thousands of experienced AT&T Government Solutions professionals go beyond expectation, deploying visionary solutions that serve our citizens, defend our nation and prepare for the future.

We serve as a trusted provider to the federal government, backed by a proven performance record in integrating network expertise with IT professional services and a

professionally managed service portfolio, which includes: traditional and IP-based voice; Wi-Fi; high-speed Internet; data transport; cyber security; cloud-based services; and mobility devices, services and applications. Our broad array of advanced technologies, dynamic service management tools, and experienced staff help us to address core government needs – reduce expenses, modernize operations to increase workforce productivity, and protect information, infrastructure and people. AT&T solutions enable agencies to focus on their mission and performance goals.

Fusing our core capabilities with innovation from AT&T Labs, we are driven to meet today's demanding agency requirements, while establishing a path to emerging technologies. Underpinning every solution we build and deliver are the global resources and assets of one of the largest providers of communications services in the world, AT&T, connecting people, infrastructure and information with speed, security and reliability.

AT&T was the first private sector company to attain certification under the Private Sector Preparedness Accreditation and Certification Program ("PS Prep" at http://www.fema.gov/media/fact_sheets/vpsp.shtm). PS-Prep is a voluntary program of accreditation and certification of private entities using standards (announced by DHS in June 2010) that promote private sector preparedness, including disaster management, emergency management, and business continuity programs. AT&T has a deep-rooted history of serving federal agencies with standard and customized life-cycle solutions that support mission goals. To learn more about the full array of AT&T products and services, contact your AT&T TacCom representative.
