The UK Group acknowledges that many governments shape their taxation policies to attract international business with the aim of stimulating investment, job creation and skills development. Where it is aligned with business and commercial strategy, the UK Group makes use of credits and incentives available in the UK to support business activities.

Governance and management of tax risk

This UK tax strategy has been approved by the UK Group Boards of Directors and applies to all members of the UK Group. The UK Group takes the view that tax risk can be financial, reputational or operational in nature. Given the scale of their businesses, risks inevitably arise from time to time in relation to interpretation of UK tax laws. When appropriate, the UK Group seeks certainty by obtaining external advice or seeking clearances from HMRC.

The tax team which supports the UK Group works with the constituent parts of the business, providing relevant and business focused advice.

Working with tax authorities

Each member of the UK Group has an open and transparent relationship with HMRC and engages cooperatively and proactively with HMRC, acting with integrity and professionalism in tax matters.
