Note 1: For Centrex service from SDP1 - 4, AT&T has reduced our MRC price from $14.46 down to $12.14.

Note 2: AT&T has done a market adjustment to the ISDN PRI service. Our adjusted MRC is $491.58. Our PRI service

Note 3: In all cases where we provide SDP 4 pricing, AT&T has adjusted our SDP 4 price to reflect the SED without

Note 4: ISDN Centrex pricing for SDP 1-4 was accurate in year 1 of the response, but was inaccurately priced at

Note 5: SDP 4 SIC reflects elimination of SED. SED must be specified on TOPS order whenever SDP 4 is used.

Note 6: Centrex Secondary SPID has been changed to Centrex Second B Channel for all SDPs for all five contract

Note 7: Channel Mileage, Channel Mileage Termination, 2001D Inter SA services are new products. These products are for use in connecting to an additional central office to accomplish number retention and are shown here for convenience. These products/services are found on the other charges pricing tab.

Note: 8 Promotional waiver for migrating services from Legacy-T to Legacy-S valid until 12.19.08.

Note 9: Foreign District Mileage, Local Channel for ISDN BRI (Centrex) within MSA 105, T1/DS1 Channel Terminations, T1/DS1 Channel Mileage: These products are for use in connecting to an additional central office to accomplish number retention and are shown here for convenience. These products/services are found on the pricing tabs for each respective product category -- Dedicated PT to PT, Features, Other Charges.

Note 10: MRC for ISDN PRI Riding AT&T-Provided/Customer-Owned SONET Transport, SDP1, Custom or National, per Modification A00008.

Note 1: AT&T will install and maintain all equipment needed to provide direct connectivity to the customer's existing equipment using standard connectors.

Note 2: AT&T will also monitor the network 24 x 7.

Note 3: Customers must be in the same LATA or MAN and service must be available in that area.

Note 4: OPT-E-MAN is not available in a meet-point billing arrangement involving other Carriers.

Note 5: OPT-E-MAN is provided at the option of AT&T where equipment and facilities permit. If appropriate facilities are not available, Special Construction charges may apply.

Note 6: If a customer connects to the OPT-E-MAN network using a bridge or switch for Layer 2 connectivity, only 50 MAC addresses can be used per Layer 2 device, per port. Any additional addresses will be assessed an additional charge, with a limit of 100 MAC addresses total per port.

Note 7: Product description and requirements may be found in Attachment 22 of the Technical Volume.

Note: An additional series of columns have been added to this tab in support of Electronic Key Line (EKL) Centrex features.

Note: Software reconfiguration by customer has been reduced to n/c to reflect there will be no charges to the Government for CentrexMate and also no charges when accomodating "soft changes" via CentrexMate.

Note: Voice mail (Basic) MRC has been reduced from $11.95 to $7.00. Additionally, AT&T is offering our Enhanced voice mail service. The Enhanced voice mail is offered at the reduced MRC price of $8.00.

Note: AT&T has reduced the TSP Provisioning MRC from $1.28 down to $0.00 and then added TSP Maintenance SIC and MRC should the Government require TSP maintenance services in addition to provisioning services.

Note: A series of Centrex features have been added to this tab primarily in support of EKL and ISDN Centrex service.

Note: Two feature bundles have been added to this tab, one for EKL Centrex and one for ISDN Centrex. These feature bundles represent commonly ordered features agencies use when subsribing to these advanced Centrex services and will work in conjunction with the standard Centrex features

Note: Second proposal revision includes pricing for Centrex number blocks.

Note: Second proposal revision verified access to 411 is no charge, but use of 411 is charged $1.50 per occurance. This entry has been added below the entry for "access to 411".

Note: Second proposal revision includes updates to TSP. TSP maintenance has been replaced by TSP restoration to more accurately reflect industry terminology. Additionally, TSP restoration has been assigned the CLIN for TSP restoration from the MAC table. Charging Unit has been modified to a "per circuit" charge to more accurately reflect correct terminology. Additional note, TSP provisioning and TSP restoration have been removed from MAC table so there are not duplicate entries.

Note: Caller ID Name rates updated.

Note: For Intercept: With Analog Business Line service, no charges apply for the initial 120 period. Subsequent monthly charges are $6.00/month per account that has closed. The maximum extension for POTS intercept is an additional 8 months beyond the 120 free period. The duration of intercept needs to be noted at the time the account is closed. The SIC for Analog Business Line Intercept has been reduced from $24.00 to n/c. For all Centrex and DID numbers: The SIC of $280 is charged per occasion, but the monthly fee of $5.00 is for a 120 day interval and priced per line. Therefore, each time Intercept with recorded announcement is requested, a single charge of $280 will apply for the Intercept request and a per line charge of $5.00 will apply every four months. The period of intercept must be determined at the time of disconnect. No free period applies for Centrex and DID intercept.

ATT Proprietary: The information contained herein is for use by authorized persons only and is not for general distribution.

12/7/2009

Expedite Charges Pricing Table

Note: Analog Business Line Expedite charges are reduced to n/c and the delivery is changed to reflect best effort.

Note: Analog and EKL Centrex Line service Expedite charges are reduced to n/c and the delivery is changed to best effort.

Note: Analog voice-grade circuits trhough T-1 Expedite charges have been changed to accurately reflect Tariff pricing for these Expedite charges services. Note, these are priced per "request." The provisioning of the expedited request is based upon available facilities and is limited to twelve (12) two-point or six (6) multi-point Analog/DS0 circuits at the same location and a limit of four (4) DS1 circuits at the same location.

Note: SONET expedite charges are limted to those that are point-to-point circuits of bandwidth speeds of OC12 or less. For OC48 Point-to-point and newly added OC3 - OC48 SONET Ring service, expedites are not available.

Note: Analog/Voice Grade/DSO Circuit expedite charges have been removed from our Expedite Charges Pricing worksheet. These charges are not needed at this time as AT&T is not proposing any of these services on our RFP response.

Note: Expedite charges for services > than T1 speeds have been removed as standard expedite charges are not available for these services as part of Tariff 19.

Usage Pricing Table

Charge Type	CLIN	Charging Unit	Price	Year
CALSC area usage Band A	XXXILX0600	6 sec increments	**0.00168**	3
Band B	XXXILX1600		**0.0024**	3
Band C	XXXILX2600		**0.0043**	3

Local Usage in Illinois is measured by: (time, distance and duration sensitive)
Band A (Local) up to 8 miles
Band B (8-15 miles)
Band C (15 + miles)

Note: AT&T has revised our usage price per minute to reflect 6-second rates.

Note: Please note that AT&T has done a market adjustment to our Band A usage.

Note: AT&T minimum billing of three 6-second increments per call. This applies to each usage band for all five contract years.

2001D Inter SA Channel-Long Haul each Additional Mile (More that 12 miles)	888IL10597	Monthly	$ 5.90	3
PIC Change Charge (Interlata)	001IL03A39	Per Line	$ 4.54	3
2PIC Change Charge (Intralata)	001IL13A39	Per Line	$ 4.40	3

*This is a standard Service Order Charge
**This is a standard Change Charge
***These charges have been removed

Note: Order processing fee by phone has been changed to n/a to reflect the Governments request not to accept order requests (TOPS orders)

Note: Soft change charges have been reduced to reflect specific feature changes where a technician will not need to be dispatched. Hard changes will require specific pricing by product and will depend upon the change needed. Therefore, Hard Change charges refer the Government to the other sections of the Pricing Workbook to support requested change.

Note: Labor Rates on this tab have been changed to reflect contract award rates on our existing Connections/Schedule 70 pricing.

Note: AT&T has added Additional Listings to this tab so the Government can get extra directory listings.

Note: AT&T has zero-rated the Program Transition costs for all five years.

Note: AT&T has updated TBD to ICB at the request of the Government.

Note: AT&T has updated Telecommunications Technician for ONBD has been updated with the notation "ONBD." Additionally, the charges for ONBD have been adjusted to accurately reflect time and a half rates. Weekends and holidays are not inlcuded in these ONBD rates.

Note: AT&T has updated ONBD rates for Cable Installer, Cable Splicer and Training Specialist to accurately reflect time and a half rates. Weekends and holidays are not inlcuded in these ONBD rates.

Note: AT&T has added our Customer Location Alternate Routing service (CLAR) to the Pricing Workbook. Additional information regarding CLAR will be included in an attached white paper.

Note: AT&T has added a fee for addition of new line-class-codes for services provisioned out of a 5ESS Switch. Line class codes define calling capabilites like 411 Call Blocking or other dialing restrictions for Centrex services.

Note: AT&T has added pricing for 1200 Baud and 9600 Baud SMDI link service (both standard and expanded).

Note: New products per mileage letter.

Note 13: New products per Modification A00008.

Note 14: The PIC Change CLIN will allow a customer to place an order to request the Long Distance Carrier (InterLATA) and/or Local Long Distance (IntraLATA) Carrier be changed. These two services are also known as PIC and 2PIC and have been added as part of Modification 00010. The PIC and 2PIC change fees are different, so each service change request will incur a separate change fee. The reconfiguration CLIN: X40ILX0511 would apply for all PIC/2PIC changes on ISDN PRIs.

Note: AT&T has changed the Item numbers to reflect correct part numbers.

Note: AT&T has removed the maintenance charges from our SED price so the SED can be purchased separate from maintenance. AT&T has added two additional columns for SED maintenance in support of CLINs and annual maintenance pricing.

Note: The set used in SDP 4 pricing has been BOLD Font typed to readily identify that SED. Any additional SED requested can subtract out the SDP 4 SED price and exchange for the new set price.

Note: At the request of the Government, AT&T has removed the proposed set for use at SDP 4 and TOPS order for SDP 4 will be required to add a set "ala carte" to the SDP 4 SIC price. Therefore, the note above no longer applies with regard to BOLD Font type for the set used.

Note: AT&T has changed the Item numbers to reflect correct part numbers.

Note: AT&T has removed the maintenance charges from our SED price so the

Note: The set used in SDP 4 pricing has been BOLD Font typed to readily identify that SED. Any additional SED requested can subtract out the SDP 4 SED price and exchange for the new set price.

Note: At the request of the Government, AT&T has removed the proposed set for use at SDP 4 and TOPS order for SDP 4 will be required to add a set "ala carte" to the SDP 4 SIC price. Therefore, the note above no longer applies with regard to BOLD Font type for the set used.

Note: The pricing for the Aastra SEDs have each been reduced in all cases and these newly reduced prices reflect at, or below Advantage contract pricing.

ATT Proprietary: The information contained herein is for use by authorized persons only and is not for general distribution.
